PLAIN LINERS

Pale blue

50/100

75/100

75/100

85/100

Plain "Ultra" 75/100ths and 85/100ths liners are manufactured using the best single layer PVC sheets available on the European and Canadian markets and have exceptional technical and mechanical characteristics.

Sand

75/100

75/100

85/100

In addition to a 10 year degressive guarantee covering the watertightness of the sheet and welding, the high stability of size of "Ultra" liners enables them to resist pool water temperatures up to **32° C** without buckling.

French blue

75/100

75/100

85/100

Watertightness of the welding and materials: 10 years with decreased effectiveness.

The extremely high quality of "Ultra" liners thus meets the new expectations and needs expressed by consumers who are undoubtedly being drawn to "comfortable pools" that are heated and covered.
